DIRECTORS' REVIEW

The Directors of Pak Elektron Limited (the "Company") are pleased to submit Company's un–audited condensed interim financial statements, for the nine month period ended on September 30, 2023.

FINANCIAL & OPERATIONAL REVIEW

Macroeconomic-Economic Environment

Global Economic Horizon

The global economy is expected to slow down substantially in 2023, growing at a rate of 2.1 percent, down from 3.1 percent in the previous year. This slowdown is due to central banks tightening monetary policies to combat high inflation. However, there is hope for a slight recovery in 2024, with growth projected to reach 2.4 percent.

Inflation has been persistent but is projected to decline gradually as demand weakens and commodity prices moderate. Global financial conditions have tightened as a result of policy rate hikes and recent bouts of financial instability. This has weighed particularly on emerging market and developing economies with greater vulnerabilities. Risks to the outlook are to the downside. Widespread banking stress could lead to significantly weaker growth outcomes. Persistent inflation could result in further monetary tightening.Global cooperation is critical to tackle climate change and support populations affected by crises and hunger.

Domestic Economic Landscape

At the start of FY2023, the economy was confronting both domestic and external challenges, domestic economic activity was expected to moderate due to contractionary monetary and fiscal policies. However, flash flood has further aggravated the challenging economic situation and deteriorated economic growth prospects. The economy was buffeted by severe floods, global price shocks, and political instability. Expansionary fiscal and monetary policy hit their limits. Growth fell, inflation jumped, the Pakistan rupee weakened, and Foreign exchange reserves shrank. In response, fiscal and monetary policy have been tightened. Downside risks to the outlook remain exceptionally high.

Despite a sharply narrowed current account deficit, foreign exchange reserves plunged. The country's Current Account recorded a deficit of USD 947 million for first quarter of financial year 23-24, with an improvement of 58% over the corresponding quarter of last year. Balance of trade recorded a deficit of USD 6.1 billion for Q1 FY'23-24 versus a deficit of USD 9.2 billion last year. Exports were recorded at USD 8.3 billion for Q1 FY'23-24, recording a decrease of around 4% while imports were recorded at USD 18.4 billion in Q1 FY'23-24, a decline of 19% when compared with same period last year. Home remittances stood at USD 6.3 billion for Q1 FY'23-24, down 20% on quarter basis.

The domestic Forex markets remained volatile for much of the year as the PKR declined by 27.40% in value since Dec'22 and stood at Rs. 289.10 as at the end of September 2023. Country's FX reserves stood at USD 4.5 billion at Sep'23, declining by 55% since Jun'22. Inflation levels continue to remain at historic high levels as CPI was measured at 31.4% for Sep'23 year on year basis. On September 14, 2023, the State Bank of Pakistan (SBP) maintained a high benchmark interest rate at 22.0%, aiming to curb inflation, which, along with elevated energy prices and increasing food inflation, is likely to dampen economic activity and hinder GDP growth in the short term.

KSE-100 index's remarkable 14% growth since December 2022, with a closing value of 46,239 points at Sep 23 end, signifies positive market performance, potentially reflecting well on the stock and financial performance. However, it should be noted that economic challenges, including high energy and food prices, may continue to pose risks and should be closely monitored in strategic planning and decision-making.

Industry Overview

According to the Pakistan Bureau of Statistics, the overall Large Scale Manufacturing Sector has exhibited a modest growth of 0.50% during July-August 2023-24 when compared to the same period in the previous year. However, the demand for electrical home appliances has shown decreasing trends, despite the challenging economic environment. In the first two months of FY23-24 production of refrigerators and air conditioners has decreased by 8.9% and 29.11%, respectively when compared with the same period last year. Deep freezer

DIRECTORS' REVIEW

production has also witnessed a significant decline, plummeting by 65.34%. This trend is noteworthy as stimulating economic activities and population growth have necessitated increased electricity consumption. To meet the rising demand for electricity transmission and distribution, there is a robust requirement for electrical and metering equipment. Nevertheless, year-on-year production quantities for transformers, energy meters, and switch gears have decreased by 32.78%, 0.5%, and 7.84%, respectively. These trends indicate the complex dynamics in the electrical appliances and equipment sector, which warrant careful monitoring and strategic planning.

These trends in the electrical appliances and equipment sector underscore the need for a comprehensive market analysis and agile business strategies to navigate the evolving economic landscape effectively. Adapting to changing consumer demands and market dynamics will be instrumental in maintaining a competitive edge in this environment.

Company Financial Performance

The company's revenues registered at Rs. 38,155 Million, indicating a 29.58% decrease compared to the corresponding period of the previous year when revenues amounted to Rs. 54,180 Million. This decline is mainly attributed to escalating imported material costs due to the global commodity price surge and the impact of a weaker local currency exchange rate. Nevertheless, it is noteworthy that the company's gross profit remains substantial at Rs. 8,136 Million, showing only a moderate 3.29% decrease from the previous year's Rs. 8,413 Million for the same period, demonstrating the company's ability to maintain a strong financial performance even in the face of these challenges.

Despite the 36.89% decrease in profit after taxation, our company has maintained profitability with profit after tax of Rs.946 Million, demonstrating resilience in challenging economic conditions. The earnings per share at Rs. 1.07 reflects our commitment to delivering value to our shareholders even in adverse circumstances, and it serves as a positive reminder of our ability to navigate such challenges. As company directors, we view this period as an opportunity to optimize our operations, improve cost efficiency, and innovate, ensuring our company is well-positioned for future growth and prosperity.

Rupees in million	Nine months ended September 30, 2023	Nine months ended September 30, 2022	Increase/ (Decrease)	Percentage %
Revenue	38,155	54,180	(16,025)	(29.58)
Gross Profit	8,136	8,413	(277)	(3.29)
Finance Cost	2,860	2,257	603	26.72
Profit before taxation	1,729	2,190	(461)	(21.05)
Profit after taxation	946	1,499	(553)	(36.89)
Earnings Per Share (Rupees)	1.07	1.98		

Summary of operating results is presented below:

Appliances Division

The Home Appliances Division (AD) achieved revenue of Rs. 17,527 million, contributing a substantial 45.94% to the company's total revenues, showcasing its vital role in our financial success. Despite the overall economic slowdown, the AD business recorded a year-on-year (YOY) revenue decrease of 40.49%, influenced by factors such as amplified input costs of products, a consequence of rising global commodity prices and the adverse effects of a weaker local currency exchange rate. This challenging environment necessitates a strategic review to identify opportunities for recovery and future growth.

It's important to recognize that similar to other industries reliant on imported inputs, the division faced increased cost pressures, which subsequently impacted profit margins. The combination of higher input costs and exchange rate dynamics underscores the division's vulnerability to global economic factors. In light of these challenges, a proactive approach to cost management and strategic planning is imperative for sustaining profitability and ensuring future growth. Empowered by our exceptional core capabilities, including state-of-the-art manufacturing and testing facilities, a highly responsive nationwide sales and after-sales services network, continuous product R&D initiatives, and a dedicated team of proficient professionals, the company stands resolutely confident in maintaining its position. These formidable assets, combined with our unwavering commitment to excellence, fortify our position in the market, even in the face of challenges.

Power Division

During the period under review Power Division (PD) business revenues registered at Rs. 20,628 million with 16.58% decrease from Rs.24,727 million of previous year similar period. Given the context of decreased revenues in the Power Division, we recognize the impact of low demand, economic slowdown, and limited development in the country are the main factors. Diversifying revenue streams, optimizing operational efficiency, and monitoring market dynamics become pivotal to ensure the division's financial sustainability and resilience. Such an approach aligns with the company's long-term strategy to navigate evolving economic environments and stimulate growth.

The growing, burdensome circular debt in the Power Division has created a highly undesirable economic environment. It has reached concerning levels due to various factors, including losses in electricity transmission and distribution (T&D) infrastructure, rampant electricity pilferage, and billing recovery inefficiencies. To effectively address this pressing issue, it is imperative to prioritize solutions such as substantial enhancements in T&D infrastructure and the implementation of tamper-free metering systems. These measures hold the potential to significantly improve billing and collections efficiency, ultimately alleviating the critical challenge posed by the escalating circular debt. Analyzing market trends and future projections, the company is aimed to align production capacities with expected demand, reflecting prudent planning.

Since its inception, the company has been actively involved in the manufacturing and sales of "Electrical Equipment" and has developed a remarkable set of capabilities, including a highly skilled team of professionals, state-of-the-art manufacturing and testing facilities, and a longstanding history of customer relationships with WAPDA and utility companies. Leveraging these substantial capabilities, the company is confident in its ability to further solidify its position as a **"Key Market Player" in the industry**.

Company Matters of Significance

Best Corporate Report Award

We are glade to announce that the company celebrated a moment of sheer triumph and elation as it seized the coveted 1st position in the "Engineering & Auto Sector," earning the prestigious Best Corporate Report Award. This recognition, generously bestowed by the Joint Committee of ICAP and ICMAP for the Annual Report of 2022, set our hearts aglow with an intoxicating mix of pride and joy. It's a testament to our unwavering dedication to transparency and excellence, making this victory all the more sweet.

Future Outlook

Global inflationary pressure intensified during recent years while during the last couple of months, the global supply chain has shown little improvement. The international commodity price outlook is favorable, which may offset the negative impact of currency depreciation. In addition, the better crop outlook due to timely measures, i.e., Kissan Package, expected political stability, and the stable exchange rate would help to achieve price stability. The inflation rate in the medium term, i.e., FY2024 and FY2025 will be normalized due to the high base effect as well as improvement in the agriculture sector, expected favorable global and domestic environments.

Demand for energy increases due to the expansion of economic activities, population growth, and rapid technological change. However, energy supply bottlenecks and reliance on imported fossil fuels can be critical for the economic outlook of any country. With this context, the government has envisioned optimizing the utilization of indigenous energy sources including hydel, solar, wind, and coal. With continued uncertainty, policymakers are focusing on preserving macroeconomic stability through tight monetary and fiscal policies while being mindful of the risks associated with financial stability.

The International Monetary Fund (IMF) has forecasted global growth at 2.8 percent in 2023 and expected to see a modest recovery to 3.0 percent next year. The risks associated with the outlook are highly skewed towards the downside, with more chances of a sharp economic slowdown. Although inflation is likely to ease steadily in 2023, it is expected that interest rates to stay at peak level until mid-2024, with important implications for global economy.

In the current economic conditions, KSE 100 index is gradually returning to its pre-pandemic levels, which, in turn, has enhanced the country's economic outlook, particularly in terms of debt sustainability. The finalization of a 9-month USD 3 billion Stand-By Arrangement (SBA) with the IMF is anticipated to provide stability to the economy. These developments have also contributed to the restoration of investor confidence, leading to positive signals in the stock market.

DIRECTORS' REVIEW

In the prevailing economic environment, the Company's EPC Department is strategically consolidating its operations. We are focusing on projects with higher profit margins and optimizing capital allocation, particularly for established projects with a track record of successful performance in our portfolio. This approach is aligned with our commitment to financial prudence and ensuring sustainable profitability.

Your directors are enthusiastic about the forthcoming developments, which they believe will enable the Company to thrive by delivering exceptional quality products.

Acknowledgement

We are grateful to company board of directors for their continued support and guidance. We are thankful to our team members for tireless efforts & dedication and also to creditors, distributers and vendors for their support in these challenging times.

Notes to the Condensed Interim Financial Statements (Un-Audited)

FOR THE NINE MONTHS PERIOD ENDED SEPTEMBER 30, 2023 (Un-Audited)

1 LEGAL STATUS AND OPERATIONS

Pak Elektron Limited ['the Company'] was incorporated as a Public Limited Company in Pakistan under the repealed Companies Act, 1913 on 03 March 1956. Registered office of the Company is situated in the province of Punjab at 17 - Aziz Avenue, Canal Bank, Gulberg - V, Lahore. The manufacturing facilities of the Company are located at 34 K.M., Ferozepur Road, Keath Village, Lahore and 14 K.M., Ferozepur Road, Lahore. The Company is listed on Pakistan Stock Exchange Limited. The principal activity of the Company is manufacturing and sale of electrical capital goods and domestic appliances.

The Company is currently organized into the following operating divisions:

- (i) Power Division: Manufacturing and sale of Transformers, Switchgears, Energy Meters and Engineering, Procurement and Construction ['EPC'] contracting.
- (ii) Appliances Division: Manufacturing, assembling and distribution/sale of Refrigerators, Deep Freezers, Air Conditioners, Microwave Ovens, LED Televisions, Washing Machines, Water Dispensers and other domestic appliances.

2 BASIS OF PREPARATION

These interim financial statements are un audited and have been presented in condensed form and do not include all the information as is required to be provided in a full set of annual financial statements. These interim financial statements should be read in conjunction with the audited financial statements of the company for the year ended December 31, 2022.

The comparative interim balance sheet as at December 31, 2022 and the related notes to the condensed interim financial information are based on audited financial statements. The comparative interim profit and loss account, interim cash flow statement, interim statement of changes in equity and related notes to the condensed interim financial information for nine months ended september 30, 2022 are based on unaudited interim financial information.

2.1 Statement of compliance

These condensed interim financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting. The accounting and reporting standards as applicable in Pakistan for interim financial reporting comprises of:

International Accounting Standard 34- Interim Financial Reporting, issued by International Accounting Standards Board (IASB) as notified under the companies Act, 2017 and

Provisions of and directives issued under the Companies Act, 2017.

Where the provisions of and directive issued under the companies Act, 2017 differ with the requirements of IAS 34, the provisions of and directives issued under the companies Act, 2017 have been followed.

2.2 Basis of measurement

These interim financial statements have been prepared on the historical cost basis except for the following items, which are measured on an alternative basis as at the reporting date.

Items	Measurement basis		
Financial liabilities	Amortized cost		
Financial assets	Fair value/amortized cost		
Investment in associate	Equity method		
Land, building, plant and machinery	Revalued amounts		
Warranty obligations	Present value		

2.3 Judgements, estimates and assumptions

The preparation of interim financial statements requires managements to makejudgements, estimates and assumptions that affect the appliacation of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions and judgements are based or historical experiance and various other factors that are believe to be reasonable under the circumstances, the result of which forms the basis of making judgements about carrying values of assets and liablities that are not readily apparent from other sources. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimated are recognised in the period in which the estimated is revised and in any future periods affected.

3 FUNCTIONAL CURRENCY

This financial information is prepared in Pak Rupees which is the Group's functional currency.

4 ACCOUNTING POLICIES AND METHODS OF COMPUTATION

The accounting policies and the methods of computation adopted in the preparation of these interim financial statements are the same as those applied in the preparation of preceding annual financial statements of the company for the year ended December 31, 2022.

16 EARNINGS PER SHARE - BASIC AND DILUTED

The calculation of basic and diluted profit per ordinary share is based on the following data:

	(Un-Audited) September 30, 2023	(Audited) December 31, 2022	
	Rupees '000'	Rupees '000'	
Profits for the period Less: dividend payable on preference shares	946,339 32,032	1,498,596 32,032	
Profit attributable to ordinary shares	914,307	1,466,564	
Number of shares	(Nun	(Number)	
Weighted average number of ordinary shares for the purpose of basic profit	856,012,155	856,012,155	
Basic earnings per share (Rupees)	1.07	1.98	

17 TRANSACTIONS WITH RELATED PARTIES

Related parties from the company's perspective comprise associated companies, post employment benefit plans and key management personnel. Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, and includes the Chief Executive and Directors of the Company.

Transactions with key management personnel are limited to payment of short term employee benefits only. The company in the normal course of business carries out various transactions with other related parties and continues to have a policy whereby all such transactions are carried out on commercial terms and conditions which are equivalent to those prevailing in an arm's length transaction.

Details of transactions and balances with related parties is as follows:

		Un-audited September 30, 2023	Un-audited September 30, 2022
		Rupees '000'	Rupees '000'
Relationship	Nature of transaction		
Provident Fund Trust	Contribution for the period	68,486	67,578
Associated company	Services acquired	31,637	40,242
Key Management Personnel	Short-term employee benefits Post employment benefits	36,852 1,494	39,214 1,660
Sponsors	Share deposit money received	-	1,849,817
	Issue of ordinary shares	-	2,549,817

17.1 All transactions with related parties have been carried out on commercial terms and conditions.

18 DATE OF AUTHORIZATION FOR ISSUE

This condensed interim financial information has been approved by the Board of Directors of the Company and authorized for issue on October 30, 2023.

19 GENERAL

- **19.1** Figures have been rounded off to the nearest thousands.
- **19.2** Comparative figures have been rearranged and reclassified, where necessary for the purpose of comparison . However there were no significant reclassification during the year.

20 OTHERS

There are no other significant activities since December 31, 2022 affecting this condensed interim financial information.

M. MURAD SAIGOL Chief Executive Officer M. ZEID YOUSUF SAIGOL Director SYED MANZAR HASSAN Chief Financial Officer
